PROFESSIONAL SUMMARY

Results-oriented full-stack developer and final-year B.E. (Information Technology) student with hands-on experience in MERN Stack, Django, and Python. Developed and deployed 6 projects spanning restaurant web apps, AI-powered agricultural platforms, client portfolio sites, and management systems. Proficient in REST API development, machine learning integration, responsive UI design, and database management (MongoDB, MySQL, SQLite). Seeking a full-stack developer or software engineering role to build scalable, user-focused applications.

TECHNICAL SKILLS

Languages: C, C++, Java, Python, JavaScript

Frontend: HTML5, CSS3, React.js, Next.js, Three.js, Bootstrap 5, Tailwind CSS, Responsive Web Design

Backend: Node.js, Express.js, Django, REST API Development

Database: MongoDB, MySQL, SQLite

ML / Data: Scikit-learn, NumPy, Pandas, Plotly, BeautifulSoup4

Tools: Git, GitHub, VS Code, Figma, Vite, Netlify, Render, Vercel

Concepts: JWT Authentication, SEO Optimization, Web Scraping, Agile Development, PDF Generation, Deployment

PROJECTS

MongoMeals — Premium Restaurant Web App | *MERN Stack, React, Vite, JWT* |

github.com/bhumit1311/MongoMeal23

- Built a full-stack fine-dining restaurant platform with interactive floor plan table booking, gourmet menu catalog with search/sort/filter, and a loyalty rewards system awarding points on orders and reservations.
- Implemented JWT-based authentication, admin dashboard for managing users, orders, reservations and event requests, and automated email notifications via Nodemailer on user registration.
- Deployed live on Vercel (mongo-meal23.vercel.app) with double-booking conflict detection, past-date blocking, and role-based access control for admin vs. standard users.

SmartFarmer — AI Crop Diagnostic Platform | *Django, Python, Scikit-learn, Plotly* |

github.com/bhumit1311/SmartFarmer

- Built a production-grade Django web app for farmers featuring AI-powered crop disease diagnosis using Decision Tree, Random Forest, and KNN models with confidence scores via scikit-learn's `predict_proba()`.
- Integrated real-time weather advisory, mandi market price tracking with Plotly charts, soil N-P-K fertilizer calculator, crop reference library for 8 Indian crops, and PDF diagnostic report generation using ReportLab.
- Implemented a farming news aggregator using BeautifulSoup4 web scraping with deduplication, and a full crop lifecycle management CRUD system tracking investment, yield, and harvest timelines.

Shraddha Videology — Freelance Portfolio Website | *HTML, CSS, JS, Node.js, Express.js, SQLite* |

github.com/bhumit1311/manavwebsite

- Built a full-stack freelance portfolio site for a video editor client with a 3D animated intro (Three.js), interactive portfolio grid with category filtering, and a multi-video showreel player with Google Drive integration.
- Developed a contact form backend with SQLite, WhatsApp deep-link integration, full SEO optimization (schema markup, sitemap.xml, robots.txt), deployed on Netlify + Render.

PG Management System | *MERN Stack* | github.com/bhumit1311

- Developed a full-stack web application managing 50+ tenants with rent payment tracking, room allocation, complaint resolution, and automated rent reminders — reducing manual admin effort by ~60%.
- Built RESTful APIs with Node.js and Express.js; integrated MongoDB for efficient data storage and retrieval.

HLH Management — Hostel Application | *Java, Firebase* | github.com/bhumit1311

- Built a hostel management app for 100+ students covering room allocation, fee management, and student records with Firebase Realtime Database for live sync and offline-first reliability.

EDUCATION

Bachelor of Engineering — Information Technology

Lok Jagruti Kendra University, Ahmedabad, Gujarat

Aug 2025 – Aug 2028

ACTIVITIES & ACHIEVEMENTS

International Conference — Poster Presentation

2024

- Presented an innovative project at an international conference, demonstrating ability to communicate technical concepts to a diverse academic audience.

Web3 & Blockchain Development Workshop

2024

- Attended structured workshop on decentralized technologies, blockchain fundamentals, and smart contract development trends.
